# About Us

## EAST INNOVATIONS

---

is a specialized and pioneering Saudi entity dedicated to providing integrated aluminum and glass façade solutions. We proudly serve as a trusted partner in executing the most prestigious construction and development projects across the Kingdom of Saudi Arabia.

We are committed to delivering high-quality products and professional installation services that meet the exact engineering and architectural requirements of villas, commercial buildings, and administrative projects.

In affirmation of our commitment to governmental and professional standards, we are proud to have obtained:

- Classification Certificate for City Service Providers (Third Degree) from the Ministry of Municipal and Rural Affairs and Housing.

# Our Vision

To be the leading innovator in the Kingdom's aluminum and glass solutions sector.

We strive to develop sustainable engineering solutions that exceed market expectations, utilizing a creative national team to contribute to the goals of the National Vision and promote Saudi talent.

# Our Objectives

We are committed to delivering excellence in every aspect of our work, from the initial consultation and design stage through installation and post-installation client service.

We strive diligently for client satisfaction at every step.

## Services & Products

### Cladding Facades

Exterior cladding with Aluminum Composite Panels (Cladding): Durable, lightweight, and fire-resistant solutions that provide buildings with a modern aesthetic appeal.

## Services & Products

### Glass Facades

**EAST INNOVATIONS** specializes in the supply and installation of structural glass facades for all commercial applications (showrooms, retail, and complexes).

We utilize the latest innovative installation methods, ensuring the highest clarity and thickness of glass, secured by premium stainless steel accessories.

## Services & Products

### Structural Glazing Facades

We specialize in installing building facades with glass panels secured to aluminum sections. Structural Glazing offers excellent resistance to wind loads and weather factors, seamlessly connecting all floors to provide enhanced building aesthetics through diverse shapes and systems.

## Services & Products

### Aluminum Doors and Windows

We specialize in the manufacturing, supply, and installation of diverse aluminum windows (sliding, tilt-and-turn, fixed, and hinged) and aluminum doors (sliding, hinged, and revolving) for all interior building applications, utilizing various aluminum profile systems.

## Services & Products

### Windows

Windows are key elements of building aesthetics, granting facades elegance and highlighting the architectural design.

Large windows are ideal for modern luxury homes, enhancing interior spaciousness and natural brightness.

**EAST INNOVATIONS** ensures that our windows combine superior durability and precise design, reflecting luxury in every detail.

## Services & Products

### Windows

We guarantee window systems with superior performance, offering:

- Integrated thermal insulation and protection against UV rays.
- Solar heat reduction of up to 80%, with a reflection of 70% of solar radiation.
- Perfect light balance: 19% light transmission ratio versus 16% light reflection and 16% shading coefficient (SC).
- A 5-year warranty on all specifications and performance.

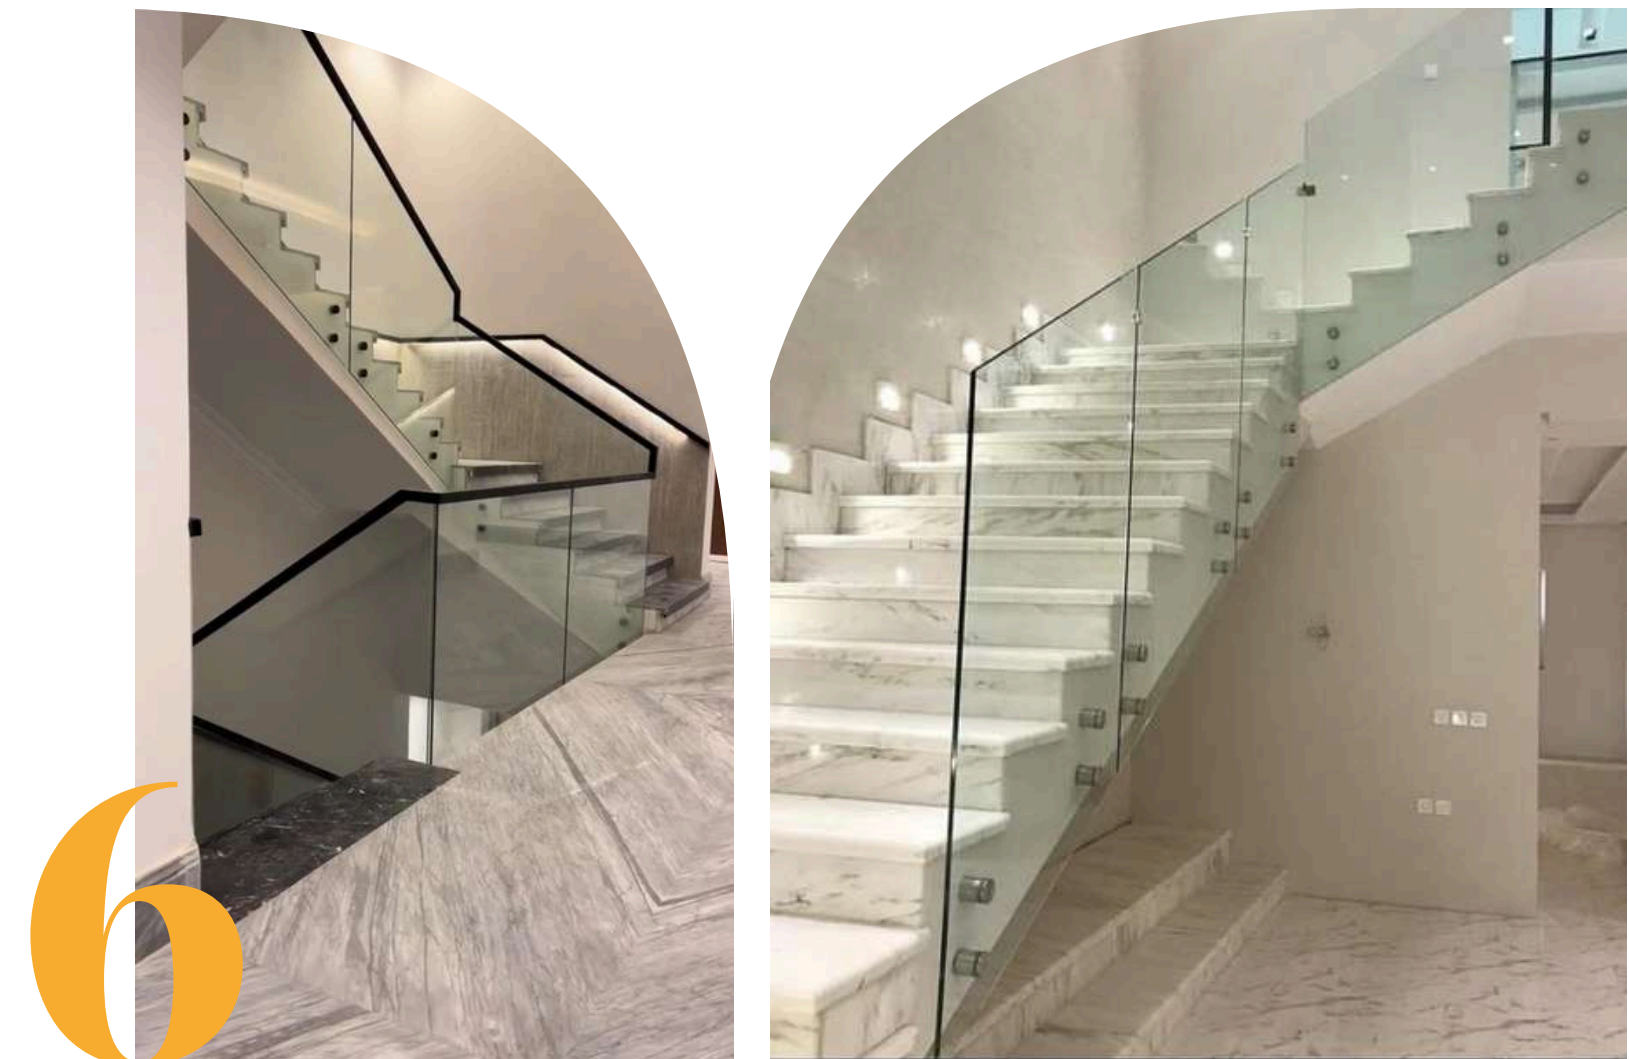

## Services & Products

### Balustrades / Railings

Supply and installation of aluminum, glass, and stainless steel balustrades, featuring modern and safe designs for stairs and walkways.

## Services & Products

### Shower Enclosures

Design, manufacturing, and installation of glass shower partitions (enclosures) using the highest quality glass and corrosion-resistant stainless steel accessories. We offer elegant and functional designs suitable for various space requirements.

## Services & Products

### Skylights

High-durability glass roofing systems that allow natural light to pass through. They are used on roofs and upper floors for ventilation and decorative purposes.

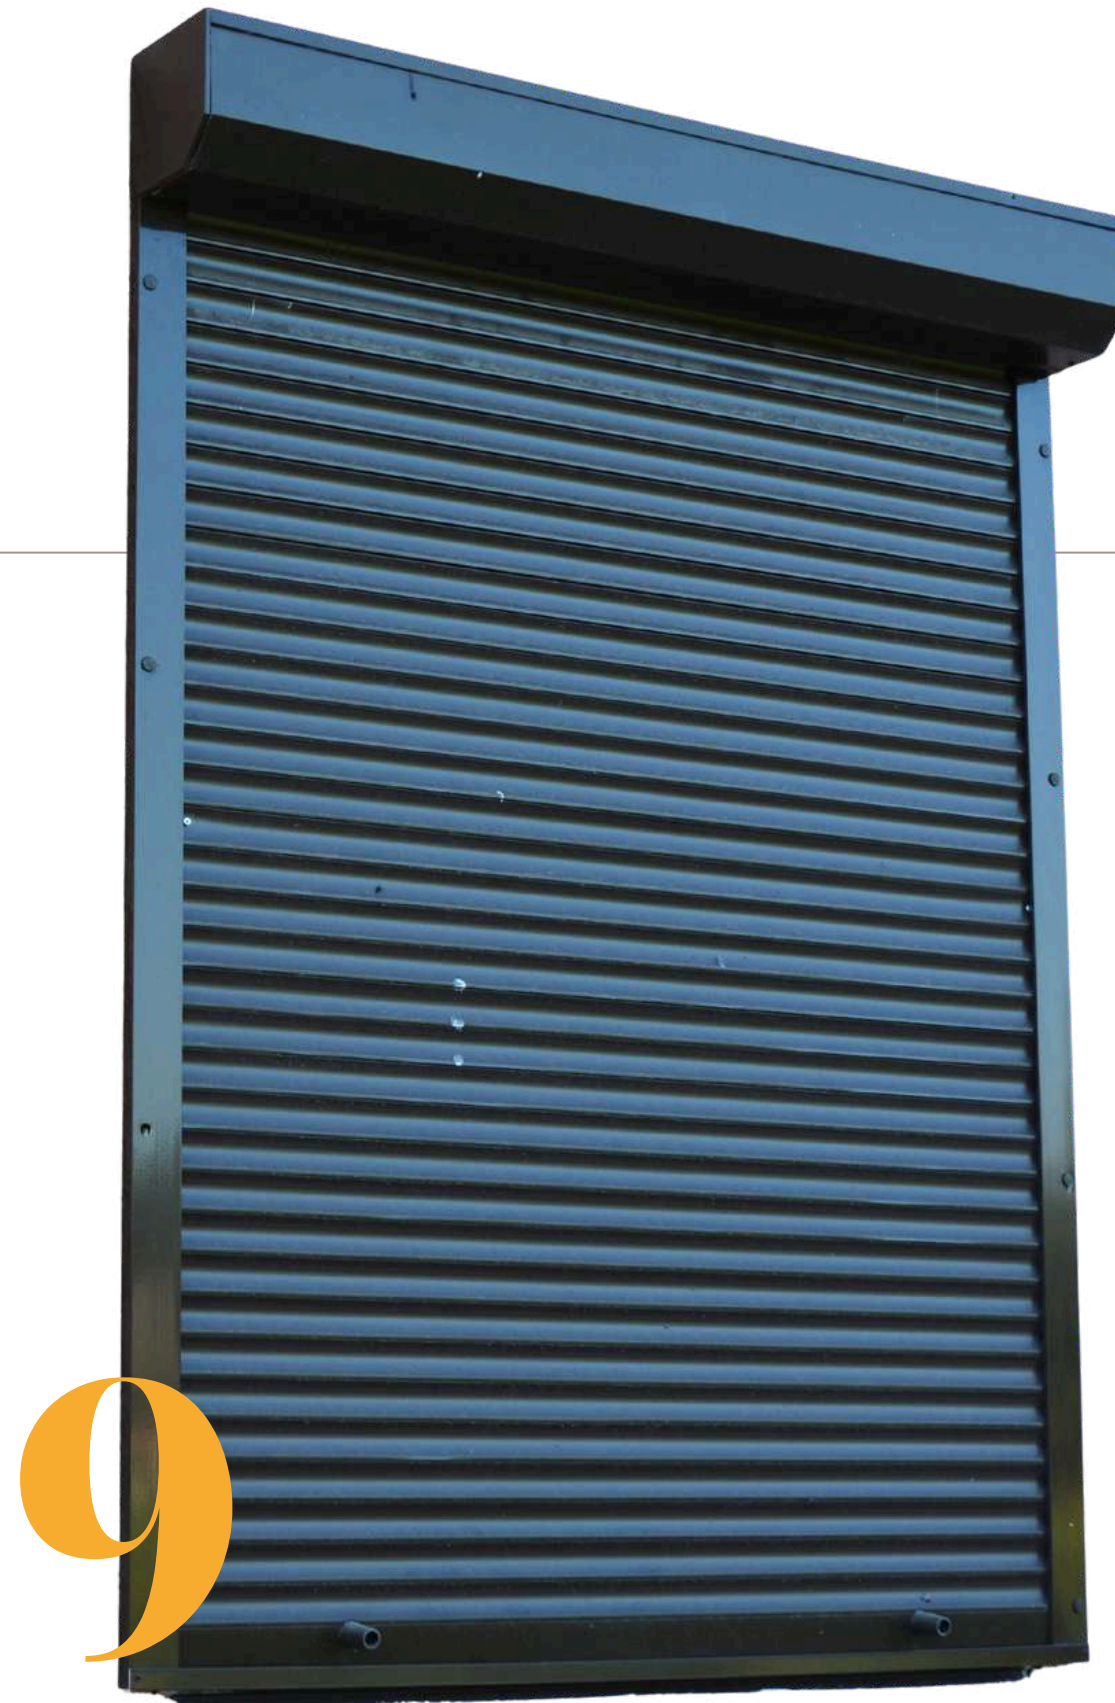

## Services & Products

### Roller Shutters (Shutter)

Roller shutters offer a modern solution combining elegance and protection. They limit sun exposure and dust while enhancing thermal insulation.

**EAST INNOVATIONS** provides high-quality shutters with luxury designs that perfectly complete the facade's aesthetic.

## Services & Products

### Office Dividers

Flexible and modern solutions for re-dividing workspaces, utilizing aluminum frames and infills of glass or other materials.

They contribute to efficient space utilization and provide acoustic and visual privacy, with the possibility of customization in design and quick installation.

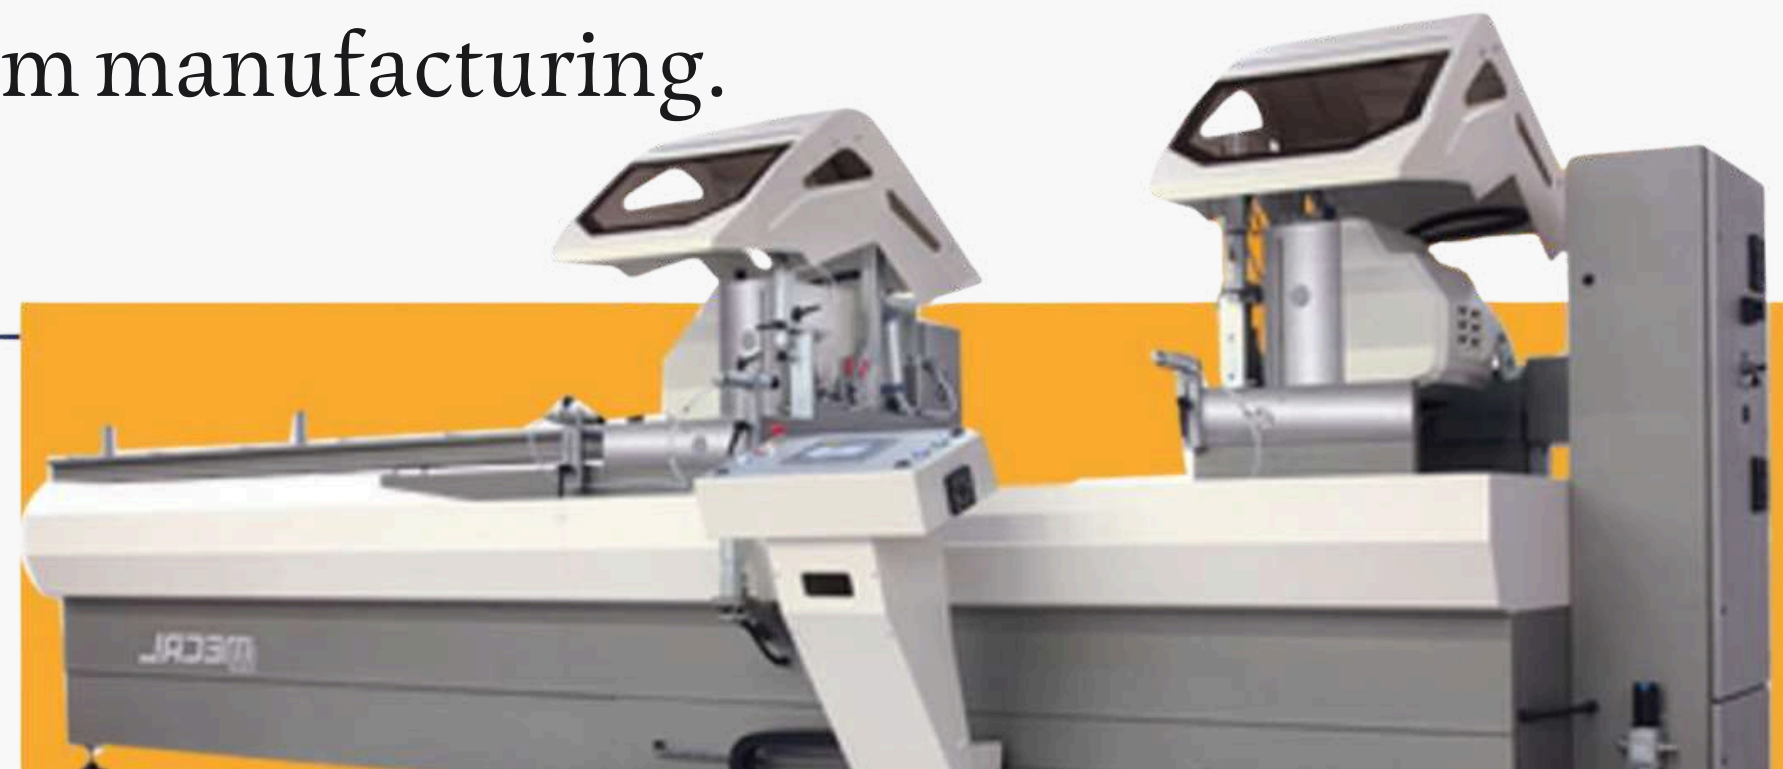

# Our Equipment

## Doubleheadmachine

This advanced machine is used for precise and efficient cutting and shaping of aluminum. It features dual cutting heads and an automated control system to enhance productivity and accurately adjust dimensions.

The machine delivers fast, precise cuts and a superior finish, making it a popular choice for achieving outstanding results in aluminum manufacturing.

# Our Equipment

## Aluminum milling

This is a specialized Computer Numerical Control (CNC) machine that uses multi-toothed cutters to precisely remove aluminum material. It is optimized for high-speed operation and cooling to create complex, lightweight, and high-precision aluminum parts.

# Our Equipment

## Crimping machine

This machine is used to precisely form and bend aluminum corners for high-quality final products such as frames, doors, and windows. Featuring automated control for accurate adjustment of pressure and angles, it ensures uniform results and high precision, significantly boosting manufacturing efficiency and productivity.

# Our Equipment

## Millingmachine

This device is used for shaping and cutting aluminum with high precision, utilizing diverse cutting tools. It features a programmable control system that allows for adjusting speed, depth, and tool path, offering flexibility to produce various shapes and sizes.

This ensures high-quality final products with dimensionally consistent and superior, smooth finishes.
